

EDUCATION BROCHURE

**FEATURING OVER 300 HOURS OF EDUCATION, INCLUDING CUTTING-EDGE
CLINICAL CONTENT DEVELOPED SPECIFICALLY FOR VISION EXPO**

BROUGHT TO YOU BY

PRODUCED BY

INTRODUCING NEW EDUCATION PRICING!

We're thrilled to introduce new pricing which makes VisionEd more affordable than ever! Enroll in hourly education, or upgrade to unlimited education for the entire CE Program to take advantage of everything VisionEd has to offer!*

DOCTORS

UNLIMITED CONTINUING
EDUCATION

\$599

A LA CARTE

\$70/hour

Select this option if you plan on taking fewer than 7 hours.

OPTICON / ALLIED HEALTH

OPTICIANS, CONTACT LENS PROFESSIONALS, ALLIED OPHTHALMIC PROFESSIONALS, OPTICAL ASSISTANTS AND OFFICE MANAGERS, FRAME BUYERS AND LAB TECHNICIANS

OPTICON @ VISION EXPO
UNLIMITED CONTINUING EDUCATION

\$349

OTHER PROFESSIONALS

PROFESSIONALS WORKING IN CORPORATE MANAGEMENT, OR SERVICE PROVIDERS

UNLIMITED CONTINUING
EDUCATION

\$539

A LA CARTE

\$70/hour

Select this option if you plan on taking fewer than 7 hours.

TOTAL OFFICE PACKAGE

SAVE BIG ON EDUCATION BY BOOKING A GROUP! REGISTER FOUR OR MORE CONFEREES FOR UNLIMITED CONTINUING EDUCATION AND SAVE 20% OFF THE CURRENT EDUCATION RATE FOR DOCTORS AND OTHER PROFESSIONALS!*

4+ CONFEREES

20% OFF*

* Total Office Package 20% discount does not apply to OptiCon Education Packages.

WORKSHOPS*

\$186

20C4: OCT Workshop
30C4: Injections and Minor Procedures Workshop
35L1: Specialty Contact Lens Workshop

*Unlimited education package does not include workshops.

FREE EDUCATION*

Global Contact Lens Forum: 10L1, 10L2, 10L3
March Madness Imaging Program: 10C1, 10C2, 10C3
(10C1 workshop limited to first 100 registrants)
Vision Series (Optometrists Only)
Innovation Stage

*Advance Registration is required for free courses.

ALL EDUCATION REGISTRATIONS INCLUDE THE FOLLOWING:

- **ADMISSION TO EXHIBITS (\$150 VALUE)**
- **ADMISSION TO EDUCATION ATTENDEE LOUNGE**

2023 VISION EXPO SUPPORTERS

BAUSCH+LOMB

Seeing beyond

2023 VISION EXPO ENDORSERS

Official Institutional Sponsor: New England College of Optometry

EDUCATION PLANNING COMMITTEE

MEET THE MEMBERS WHO HAVE BEEN ACTIVELY INVOLVED IN THE DEVELOPMENT OF THIS YEAR'S EDUCATION MEETING.

Mark Dunbar, OD, FAAO
EPC Co-Chairman
Michigan College of Optometry at Ferris State University

Millicent Knight, OD, FAAO
Illinois College of Optometry

Marc Bloomenstein, OD, FAAO
EPC Co-Chairman
New England College of Optometry

Jack Schaeffer, OD
University of Georgia, Southern College of Optometry

Melissa Barnett, OD, FAAO, FSLs, FBCLA
UC Berkeley School of Optometry

Vincent Young, MD
Temple University, Temple University Medical School

Michael Kling, OD
Southern College of Optometry

Thomas Quinn, OD
Interim GCLF Director
Ohio University College of Medicine

OPTICON ADVISORY BOARD

MEET THE MEMBERS WHO HAVE BEEN ACTIVELY INVOLVED IN THE DEVELOPMENT OF THIS YEAR'S EDUCATION MEETING.

Janet Acara, ABOC, NCLEM
Erie Community College

Tina Palumbo
OAB Co-Chair, Foerster & Hayes LTD,
ABO-NCLE Board Public Member

Tom Barracato, ABOC, NCLEC
Owner, Adolph Optical

Carri L. Russell, NCLEM
Bausch Health Speciality Vision Products
NCLE Chair

Sandra K. Brown, ABOM, NCLEC
VisionWorks

Phernell Walker, MBA, ABOM, NCLEC
Pure Optics LLC, OAB Co-Chair
ABO-NCLE Board Member, Treasurer

Curt Duff, ABOM, NCLEM
Owner, Tinder-Krauss-Tinder, ABO Chair

CLINICAL HIGHLIGHTS

GLAUCOMA

- 11C1 Glaucoma Grab Bag: Practical Guidelines for Effective Glaucoma Management
- 12C1 Problem Solving in Glaucoma Management
- 21C1 MIGS in Glaucoma
- 23C1 A Roadmap for Making the Diagnosis in Glaucoma
- 23C6 Corneal Hysteresis and IOPcc: Glaucoma Vitals for the Modern Era
- 25C1 A Roadmap to Medical Management of Glaucoma
- 26C1 Individualizing Glaucoma Treatment: Understanding How to Utilize Traditional and Novel Agents
- 31C1 Visual Fields, A Virtual Reality
- 33C1 Innovations in Glaucoma: Next Generation Technology, Medications, and Delivery
- 35C1 Glaucoma Grand Rounds

PRESBYOPIA

- 25C2 The Optometrist's Guide to Managing Presbyopia
- 36C2 Topical Management of Presbyopia now and tomorrow
- 41B3 Meet Your ROI Dream: Your New "Presbyopia Management Clinic"

ANTERIOR SEGMENT

- 12C2 Corneal Relationship Therapy: Managing the Neurotrophic Keratitis
- 21C2 The Pain Game, Exploring Ocular Pain and Inflammation
- 23C2 MGD and DB: New Technology for Diagnosis and Management
- 25C4 Flexing your Optometric Skills: A Practical Hands On Management of Common Anterior Segment Challenges
- 26C6 Intersection of Dry Eye and Beauty: Design, Build and Brand a Profitable Dry Eye Spa
- 33C2 The Greatest Anterior Segment Disease and Medical Management of Contact Lens Complications Course Ever
- 36C3 Keratoconus and Crosslinking in the 21st Century
- 42C1 Practical Approach to Uveitis Management
- 43C2 Nuts and Bolts of Dry Eye Technology
- 43C3 Periocular Malignancies

SURGICAL/CO-MANAGEMENT

- 24C4 Pharmacology Update
- 25C6 Lights, Lasers, Action! Incorporating Aesthetics Into Your Practice
- 33C3 Laser Therapy and Advanced Procedures
- 33C6 2020 And Beyond Surgical Innovations and Updates
- 35C6 Rapidly Changing Landscape of Refracting Technology

IMAGING TECHNOLOGY

- 10C1 March Madness: Case Challenges in Optometry - Optimizing Ocular Imaging Workshop
- 10C2 March Madness: Case Challenges in Optometry - Optimizing Ocular Imaging Round 1
- 10C3 March Madness: Case Challenges in Optometry - Optimizing Ocular Imaging Semifinals and Finals
- 20C4 OCT Workshop
- 23C3 OCT/OCTA: the What, When and How
- 26C4 Getting Started With OCT
- 31C1 Visual Fields, A Virtual Reality
- 31C5 OCT Angiography
- 33C5 A Multimodal Imaging Grand Rounds

HANDS ON WORKSHOP

- 20C4 OCT Workshop
- 30C4 Injections and Minor Procedures Workshop
- 35L1 Specialty Contact Lens Workshop

MYOPIA

- 11C4 Myopia Control
- 23L1 Incorporating Myopia Management Into Practice
- 26L1 How To Set Achievable Myopia Management Expectations

CONTACT LENS

- 10L1 GLOBAL CONTACT LENS FORUM: Elevating Your Contact Lens Practice
- 10L2 GLOBAL CONTACT LENS FORUM: Seeing Red: Practical Problem-Solving of CL Red Eye
- 10L3 GLOBAL CONTACT LENS FORUM: Marketing for Specialty Contact Lenses
- 21L1 Dry Eye and Contact Lens Wear
- 25L1 How To Build An Ortho-K Practice
- 34L1 Keratoconus 1, 2, 3 Keratoconus Management Made Simple
- 36L1 Superhuman Vision: Enhance, Restore and Extend Reality
- 42L1 Corneal Diagnostics A-Z
- 43L1 Innovations in Multifocal Contact Lenses

This activity is supported by unrestricted grants from Genentech, Johnson & Johnson, Sight Sciences, Tarsus and Zeiss Meditec.

LOW VISION

- 34C3 Expand Your Practice: How To Integrate Low Vision Into Everyday Patient Care and Improve Outcomes

POSTERIOR SEGMENT/RETINA:

- 21C5 COVID 19, Diabetes, Hypertension, and Racial Health Disparities
- 23C5 AMD: The Past, Present and Future
- 24C3 Grand Rounds Retina Potpourri, It's Not Rare if it's in Your Chair
- 25C5 The OD Role in Diabetes
- 26C5 What's Hot in Retina
- 31C2 Advancing the Understanding of Geographic Atrophy
- 31C3 New Technology in Eye Care
- 35C5 The Greatest Posterior Segment Disease Course Ever

PHARMACOLOGY

- 11C3 Ophthalmic Therapeutics Update
- 35C3 Oral Pharmaceuticals in an Optometric Practice
- 45C1 Management of Ocular Pain: Considerations when Prescribing Opiates

OPTOMETRIC/SURGICAL PROCEDURES

- 30C4 Injections and Minor Procedures Workshop

SYSTEMIC DISEASE - DIABETES

- 23C4 Under Pressure - The New Hypertension Guidelines
- 26C2 Systemic Medications in Optometry
- 45C2 Exploring the Autoimmune Diseases: A Systemic Approach

CLINICAL CONTENT

Custom designed for Vision Expo by the Education Advisory Board, our 2023 program is organized by key content areas including glaucoma, posterior segment/retina, anterior segment/dry eye, surgical/co-management, and systemic disease and diabetes. Here you will discover courses specifically developed to immerse you in the most cutting-edge developments for better patient care. Learn from the most knowledgeable experts in the field of optometry as they unveil leading-edge technology and the latest trends in the diagnosis and treatment of common eye diseases. 13 clinical tracks with over 170 hours of content will keep you at the forefront of the industry.

EDUCATION HIGHLIGHTS

SCLERAL LENS TRACK

Scleral lens fitting is one of the fastest growing segments of specialty contact lens practice. Their impact can be profound and life changing, both to the patient and the practice. This tract will provide comprehensive and highly clinical information on how to select a scleral lens design for both basic and advance cases, how to assess the fit and how to solve problems that may develop. Learn skills that will take your abilities and patient satisfaction to the next level.

- 31L1 Scleral Lens Basic Fitting
- 33L1 Scleral Lens Troubleshooting
- 35L1 Specialty Contact Lens Workshop

VISION SERIES

This all-new-for-2023 format invites you to grab a bite to eat or drink and continue learning over breakfast or lunch. Take a break from the exhibit hall or formal classroom learning as industry leaders address the latest clinical innovations in a relaxed and collaborative learning environment. Then put theory into practice by heading back into the exhibit hall to connect and build on your classroom learning. Vision Series sessions are open to Optometrists only. **NOT FOR CREDIT.**

Please check our website east.visionexpo.com for the list of Vision Series sessions.

INNOVATION STAGE

Located in the exhibit hall at The Bridge, our Innovation Stage sessions feature free, sponsored content for all attendees. Learn about the latest products and services over complimentary snacks and beverages in a casual, soft-seating environment.

Please check our website east.visionexpo.com for the list of Innovation Stage sessions.

FREE EDUCATION GLOBAL CONTACT LENS FORUM

This free, informative and highly attended 'meeting within a meeting' provides attendees with practical, timely tips in both clinical and business processes that will take your specialty contact lens practice to the next level. A panel of respected, highly successful contact lens practitioners will provide personal insights gleaned from their real world experience. This will be followed by practical problem-solving of the contact lens red eye. Finally, learn about marketing for specialty contact lenses.

THE GLOBAL CONTACT LENS FORUM IS DIRECTED BY THOMAS QUINN, OD

THURSDAY, MARCH 16

7:00 AM - 8:00 AM
10L1 - Elevating Your Contact Lens Practice

Moderator: Thomas Quinn, OD
Panelists: Melanie Frogozo, OD; Jason Compton, OD; Sheila Morrison, OD

8:00 AM - 9:00 AM
PROMOTIONAL BREAKFAST SYMPOSIUM

A Contact Lens for Every Patient

Presented by: Coopervision

Justin Kwan, OD, FAAO; Steve Rosinski, OD

NOT FOR CREDIT

9:15 AM - 11:15 AM
10L2 - Seeing Red: Practical Problem-Solving of CL Red Eye

Speakers: Thomas Quinn, OD; Melanie Frogozo, OD; Jason Compton, OD; Sheila Morrison, OD

11:30AM-12:30PM
10L3 - Marketing for Specialty Contact Lenses

Speaker: Jason Compton, OD

12:30PM-1:00PM
PROMOTIONAL LUNCH SYMPOSIUM

MAXimize Contact Lens Technology for Your Patients

Presented by: Johnson & Johnson Vision

Speaker: Kurt Moody OD, FAAO

NOT FOR CREDIT

1:00PM-1:30PM
PROMOTIONAL LUNCH SYMPOSIUM

Presented by: Bausch + Lomb

NOT FOR CREDIT

4 HOURS FREE CE | ADVANCED REGISTRATION REQUIRED | ACCREDITATION PENDING - COPE, NCLE, FL BOARDS OF OPTOMETRY + OPTICIANRY, NY STATE OPTICIAN - CONTACT LENS - INTERMEDIATE

MARCH MADNESS

In the spirit of high stakes competition, panelists will compete against each other by presenting interesting cases highlighting imaging technology. The audience decides who wins each match via attendee interactive polling technology. The competition is fierce and the stakes are high as the loser goes home and the winner advances until the final showdown. Come be a part of this unique program that captures the thrill of victory and the agony of defeat as a champion gets crowned.

THURSDAY, MARCH 16

11:15AM-1:15PM

10C1 – March Madness: Case Challenges in Optometry - Optimizing Ocular Imaging Workshop

Speaker: Mark Dunbar, OD, FAAO

LIMITED ATTENDANCE

1:30PM-3:30PM

10C2 – March Madness: Case Challenges in Optometry - Optimizing Ocular Imaging Round 1

Moderator: Mark Dunbar, OD, FAAO
Panelists: Julie Rodman, OD; Mohammad Rafieetary, OD; Steven Ferrucci, OD; Carolyn Majcher, OD; Marc Bloomenstein, OD; Spencer Johnson, OD; Mark Schaeffer, OD

3:45PM-4:45PM

10C3 – March Madness: Case Challenges in Optometry - Optimizing Ocular Imaging Semifinals and Finals

Moderator: Mark Dunbar, OD, FAAO
Panelists: Julie Rodman, OD; Mohammad Rafieetary, OD; Steven Ferrucci, OD; Carolyn Majcher, OD; Marc Bloomenstein, OD; Spencer Johnson, OD; Mark Schaeffer, OD

5 HOURS FREE CE | ADVANCED REGISTRATION REQUIRED | ACCREDITATION PENDING - COPE, FL BOARD OF OPTOMETRY

THURSDAY MARCH 16

ABOUT ACCREDITATION

The accreditation designations serve as a guide to assist you with course selections. The courses listed are "pending CE approval." Please refer to VEW2023.com/Policies for current CE approvals. You can change a course selection after you register by calling Client Services at 1.800.811.7151.

Vision Expo is not responsible for courses that do not receive accreditation. Do not assume that the courses you register for will be approved. You will not receive credit if you are late to a course. Course approval information will also be available onsite in the Education Office.

EDUCATION REGISTRATION

- Course handouts will be available online prior to the Education Program. They will not be available onsite. After you register for your courses, you will be able to print your own course handouts and bring them to the Education Program. Course handouts will also be available online for one month after the program and on the Vision Expo Mobile App.
- In an effort to improve the Education registration process, badges will not be mailed. Please bring your confirmation letter with barcode onsite to Registration to have your badge and course itinerary printed when you arrive at the conference. This will ensure that you have the most up-to-date course information on your badge barcode and course itinerary, including room numbers.
- Your badge barcode will have all of your registered courses embedded in it, which is required for course entry. If you make any course changes onsite after you have already printed your badge, you will need to get a new badge printed so that your current courses are embedded in your updated badge barcode.
- After the Education Program, you will receive a letter via e-mail verifying your course attendance. Please submit this letter to your state board/national accreditation agency for license renewal. If you did not supply an e-mail address when you registered, please update your registration record by calling Client Services at 1.800.811.7151.

Visionix: Efficiency without compromise

A powerhouse of equipment in a small footprint

Visionix integrated devices combine multiple test functionalities in a small package—providing all necessary data for a comprehensive screening in a small footprint. The compact Eye Refract and VX 650 can be placed on a single tabletop or separately in a five square feet pre-test room. The optional table's ergonomic design allows a wheelchair to fit comfortably, an excellent benefit for practitioners who see patients with special needs.

Now you can add OCT to this compact and efficient set-up with the Optovue iScan 80 by Visionix software assisted OCT.

Automated anterior and posterior screening

VX 650 offers anterior and posterior segment screening in a single device with the touch of a button. Technologies include Shack-Hartmann wavefront aberrometry, Scheimpflug imaging, Placido Ring topography, retro-illumination, anterior chamber analysis, pachymetry, non-contact tonometry, anterior and posterior corneal tomography, and 45-degree retinal imaging.

Computer-assisted binocular refraction

The 2nd generation Eye Refract utilizes a unique and innovative technology which performs an automatic binocular refraction powered by computer-generated algorithms. With over 5.5 million refractions to date and accuracy backed by published ARVO studies, it is a device you can confidently rely on.

The OCT that practically runs itself

iScan 80 OCT offers all of the scans available on a traditional OCT with the added benefit of simplified operation. Scan acquisition is as easy as positioning the patient with the assistance of iScan 80's Pupil Alignment Technology, choosing the scan and pushing start. iScan 80 performs all of the focus and alignment operations while talking the patient through the entire exam.

Optimize diabetic and glaucoma screening

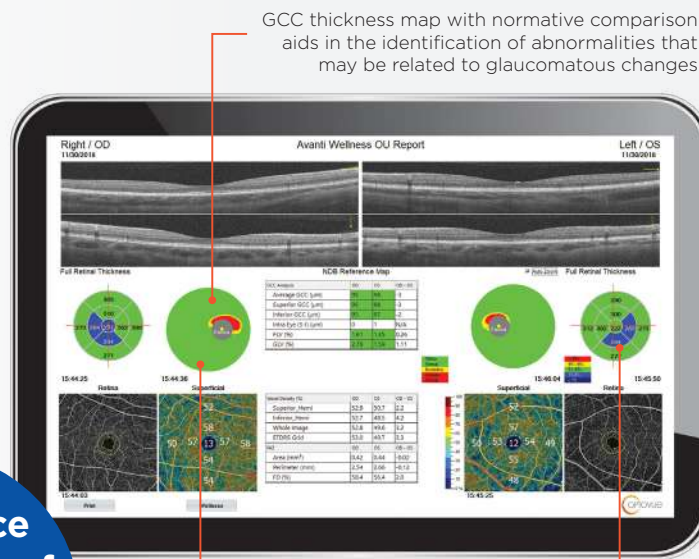

Elevate wellness

The Optovue AngioWellness scan by Visionix enables comprehensive assessment of your diabetic patients and glaucoma suspects by combining structural information on retinal and ganglion cell thickness with objective metrics on retinal vasculature. Utilize Faz Analytics to uncover early indicators of diabetic changes.

Elevate patient care

If you're looking for ways to promote better monitoring of patient eye health and differentiate your practice, look into the AngioWellness scan. In just seconds, this all-in-one report streamlines your exam process by quickly confirming normal — or helping you more efficiently diagnose pathology.

Experience a full range of Optovue OCTs at booth #F2205

GCC thickness map with normative comparison aids in the identification of abnormalities that may be related to glaucomatous changes

Vessel density map shows areas of capillary dropout that may indicate early changes in diabetic eyes or correlate with structural or visual field changes in glaucoma patients

Retinal thickness map displays areas of thickening or thinning that may be associated with conditions such as diabetic retinopathy

ZEISS CLINICAL APPLICATIONS

Open Office Hours

For new technicians

Register now

Weekly training for ZEISS CIRRUS OCT, IOLMaster, CLARUS and HFA3

ZEISS Clinical Applications Open Office Hours are weekly training sessions curated specifically for new technicians to build instrument skills and confidence. The ZEISS Clinical Applications team leads weekly sessions on the ZEISS CIRRUS OCT, IOLMaster, CLARUS and HFA3 to share foundational knowledge and pearls for acquiring the best images and measurements.

To maintain a high level of interaction, classes are kept small and can include operating instruments remotely. And prior to every session attendees are invited to submit questions to ensure the content covered is focused on their training needs.

ZEISS Clinical Applications Open Office Hours are 45-minute sessions held weekly on Wednesday and begin at 11:30 AM ET / 8:30 AM PT.

For the class schedule and registration, visit [Open Office Hours](#).

For the treatment of all stages
of neurotrophic keratitis (NK)

NOT JUST ANY SOLUTION A RESOLUTION

Complete and long-lasting resolution of NK for most patients*¹⁻⁴

- Up to 72% of patients achieved complete corneal healing in clinical trials**¹⁻³
- 80% of these patients remained healed at 1 year (REPARO trial)*⁴

* Resolution was evaluated in clinical trials as complete corneal healing, defined as the absence of staining in the lesion area and no persistent staining in the rest of the cornea after 8 weeks of treatment and as <0.5-mm lesion staining at 48-week follow-up.^{1,3}

† Key study findings were after 8 weeks of treatment, 6 times daily. REPARO (Study NGF0212): 52 European patients with neurotrophic keratitis (NK) in 1 eye per group; 72% of patients completely healed; vehicle response rate 33.3%. Study NGF0214: 24 US patients with NK in 1 or both eyes per group; 65.2% completely healed; vehicle response rate 16.7%.^{2,3}

Important Safety Information

WARNINGS AND PRECAUTIONS

Use with Contact Lens

Contact lenses should be removed before applying OXERVATE because the presence of a contact lens (either therapeutic or corrective) could theoretically limit the distribution of cenegermin-bkbj onto the area of the corneal lesion. Lenses may be reinserted 15 minutes after administration.

Eye Discomfort

OXERVATE may cause mild to moderate eye discomfort such as eye pain during treatment. The patient should be advised to contact their doctor if a more serious eye reaction occurs.

ADVERSE REACTIONS

In clinical trials, the most common adverse reaction was eye pain following instillation which was reported in approximately 16% of patients. Other adverse reactions occurring in 1% to 10% of OXERVATE patients and more frequently than in the vehicle-treated patients included corneal deposits, foreign body sensation, ocular hyperemia, ocular inflammation and tearing.

USE IN SPECIFIC POPULATIONS

Pregnancy

There are no data from the use of OXERVATE in pregnant women to inform any drug associated risks.

Lactation

The developmental and health benefits of breastfeeding should be considered, along with the mother's clinical need for OXERVATE, and any potential adverse effects on the breastfed infant from OXERVATE.

Pediatric Use

The safety and effectiveness of OXERVATE have been established in the pediatric population. Use of OXERVATE in pediatric patients 2 years of age and older is supported by evidence from adequate and well-controlled trials of OXERVATE in adults with additional safety data in children.

INDICATION

OXERVATE® (cenegermin-bkbj) ophthalmic solution 0.002% (20 mcg/mL) is indicated for the treatment of neurotrophic keratitis.

DOSAGE AND ADMINISTRATION

Instill one drop of OXERVATE in the affected eye(s), 6 times a day at 2-hour intervals for eight weeks.

To report ADVERSE REACTIONS, contact Dompé U.S. Inc. at 1-833-366-7387 or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.

Please see the Brief Summary of full Prescribing Information for OXERVATE on the following page.

oxervate® 
(cenegermin-bkbj ophthalmic
solution) 0.002% (20 mcg/mL)

Brief Summary of full Prescribing Information

Consult the full Prescribing Information for complete product information, available at www.oxervate.com/prescribing-information.

INDICATIONS AND USAGE

OXERVATE® (cenegermin-bkbj) ophthalmic solution 0.002% is indicated for the treatment of neurotrophic keratitis.

DOSAGE AND ADMINISTRATION

General Dosing Information

Contact lenses should be removed before applying OXERVATE and may be reinserted 15 minutes after administration.

If a dose is missed, treatment should be continued as normal, at the next scheduled administration.

If more than one topical ophthalmic product is being used, administer the eye drops at least 15 minutes apart to avoid diluting products. Administer OXERVATE 15 minutes prior to using any eye ointment, gel or other viscous eye drops.

Recommended Dosage and Dose Administration

Instill one drop of OXERVATE in the affected eye(s), 6 times a day at 2-hour intervals for eight weeks.

WARNINGS AND PRECAUTIONS

Use with Contact Lens

Contact lenses should be removed before applying OXERVATE because the presence of a contact lens (either therapeutic or corrective) could theoretically limit the distribution of cenegermin-bkbj onto the area of the corneal lesion. Lenses may be reinserted 15 minutes after administration.

Eye Discomfort

OXERVATE may cause mild to moderate eye discomfort such as eye pain during treatment. The patient should be advised to contact their doctor if a more serious eye reaction occurs.

ADVERSE REACTIONS

Clinical Studies Experience

Because clinical studies are conducted under widely varying conditions, adverse reaction rates observed in the clinical studies of a drug cannot be directly compared to rates in the clinical studies of another drug and may not reflect the rates observed in practice.

In two clinical trials of patients with neurotrophic keratitis, a total of 101 patients received cenegermin-bkbj eye drops at 20 mcg/mL at a frequency of 6 times daily in the affected eye(s) for a duration of 8 weeks. The mean age of the population was 61 to 65 years of age (18 to 95). The majority of the treated patients were female (61%). The most common adverse reaction was eye pain following instillation which was reported in approximately 16% of patients. Other adverse reactions occurring in 1-10% of OXERVATE patients and more frequently than in the vehicle-treated patients included corneal deposits, foreign body sensation, ocular hyperemia, ocular inflammation and tearing.

USE IN SPECIFIC POPULATIONS

Pregnancy

Risk Summary

There are no data from the use of OXERVATE in pregnant women to inform any drug associated risks.

Administration of cenegermin-bkbj to pregnant rats or rabbits during the period of organogenesis did not produce adverse fetal effects at clinically relevant doses. In a pre- and postnatal development study, administration of cenegermin-bkbj to pregnant rats throughout gestation and lactation did not produce adverse effects in offspring at clinically relevant doses.

Lactation

Risk Summary

There are no data on the presence of OXERVATE in human milk, the effects on breastfed infant, or the effects on milk production. The developmental and health benefits of breastfeeding should be considered, along with the mother's clinical need for OXERVATE, and any potential adverse effects on the breastfed infant from OXERVATE.

Pediatric Use

The safety and effectiveness of OXERVATE have been established in the pediatric population. Use of OXERVATE in this population is supported by evidence from adequate and well-controlled trials of OXERVATE in adults with additional safety data in pediatric patients from 2 years of age and older.

Geriatric Use

Of the total number of subjects in clinical studies of OXERVATE, 43.5 % were 65 years old and over. No overall differences in safety or effectiveness were observed between elderly and younger adult patients.

NONCLINICAL TOXICOLOGY

Carcinogenesis, Mutagenesis, Impairment of Fertility

Carcinogenesis and Mutagenesis

Animal studies have not been conducted to determine the carcinogenic and mutagenic potential of cenegermin-bkbj.

Impairment of fertility

Daily subcutaneous administration of cenegermin-bkbj to male and female rats for at least 14 days prior to mating, and at least 18 days post-coitum had no effect on fertility parameters in male or female rats at doses up to 267 mcg/kg/day (1709 times the MRHOD).

In general toxicology studies, subcutaneous and ocular administration of cenegermin-bkbj in females was associated with ovarian findings including persistent estrus, ovarian follicular cysts, atrophy/reduction of corpora lutea, and changes in ovarian weight at doses greater than or equal to 19 mcg/kg/day (119 times the MRHOD).
